Forward-looking statements

This presentation contains forward-looking statements about, among other things, trend analyses and statements regarding future events, anticipated growth and industry prospects, and our strategies, expectation or plans regarding product releases and enhancements. The achievement or success of the matters covered by such forward-looking statements involves risks, uncertainties and assumptions. If any such risks or uncertainties materialize or if any of the assumptions prove incorrect, results or outcomes could differ materially from those expressed or implied by these forward-looking statements. The risks and uncertainties referred to above include those factors discussed in Salesforce's reports filed from time to time with the Securities and Exchange Commission, including, but not limited to our ability to meet the expectations of our customers; uncertainties regarding AI technologies and their integration into our product offerings; the effect of evolving domestic and foreign government regulations; regulatory developments and regulatory investigations involving us or affecting our industry; our ability to successfully introduce new services and product features, including related to AI and Agentforce; our ability to execute our business plans; the pace of change and innovation and our ability to compete in the markets in which we participate; and our ability to maintain and enhance our brands.

Coffee on us.

The first 4,000 attendees to provide feedback on this event will receive a \$5 Starbucks gift card.*

1. Download the Salesforce Events mobile app.
2. Navigate to surveys.
3. Complete (4) session surveys and the Event Survey.
4. Redeem your gift at Badge Pickup in-person on the last day of the event.

*Restrictions apply. See terms and conditions at sforce.co/survey-terms

Thank you

**From knowing exact
field and object to
semantically
discovering your data**

Meet the Salesforce Catalog (GA Oct)

How semantic meaning, grounding context, and metadata reusability power trusted AI agents

The Result: Deterministic, Semantic Discovery That Powers High-Trust Agentic Workflows

Anatomy of a Grounded Context

Powering trusted agents with rich semantic context

salesforce

Technical metadata

the structural skeleton

Schema objects, fields, picklists

Security perm sets, sharing

Automation Apex, triggers, flows

UI LWC, pages, list views

Integrations APIs, credentials

Agentforce agents, topics, actions

Configuration custom metadata,
settings

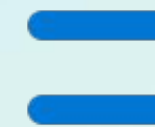

Connective tissue relationships
and dependencies

Business enrichment

the meaning layer

- Plain-language descriptions
- Business terms and glossary
- Business rules and logic
- Process mapping
- Domain semantics

Grounded context

what your agents reason over

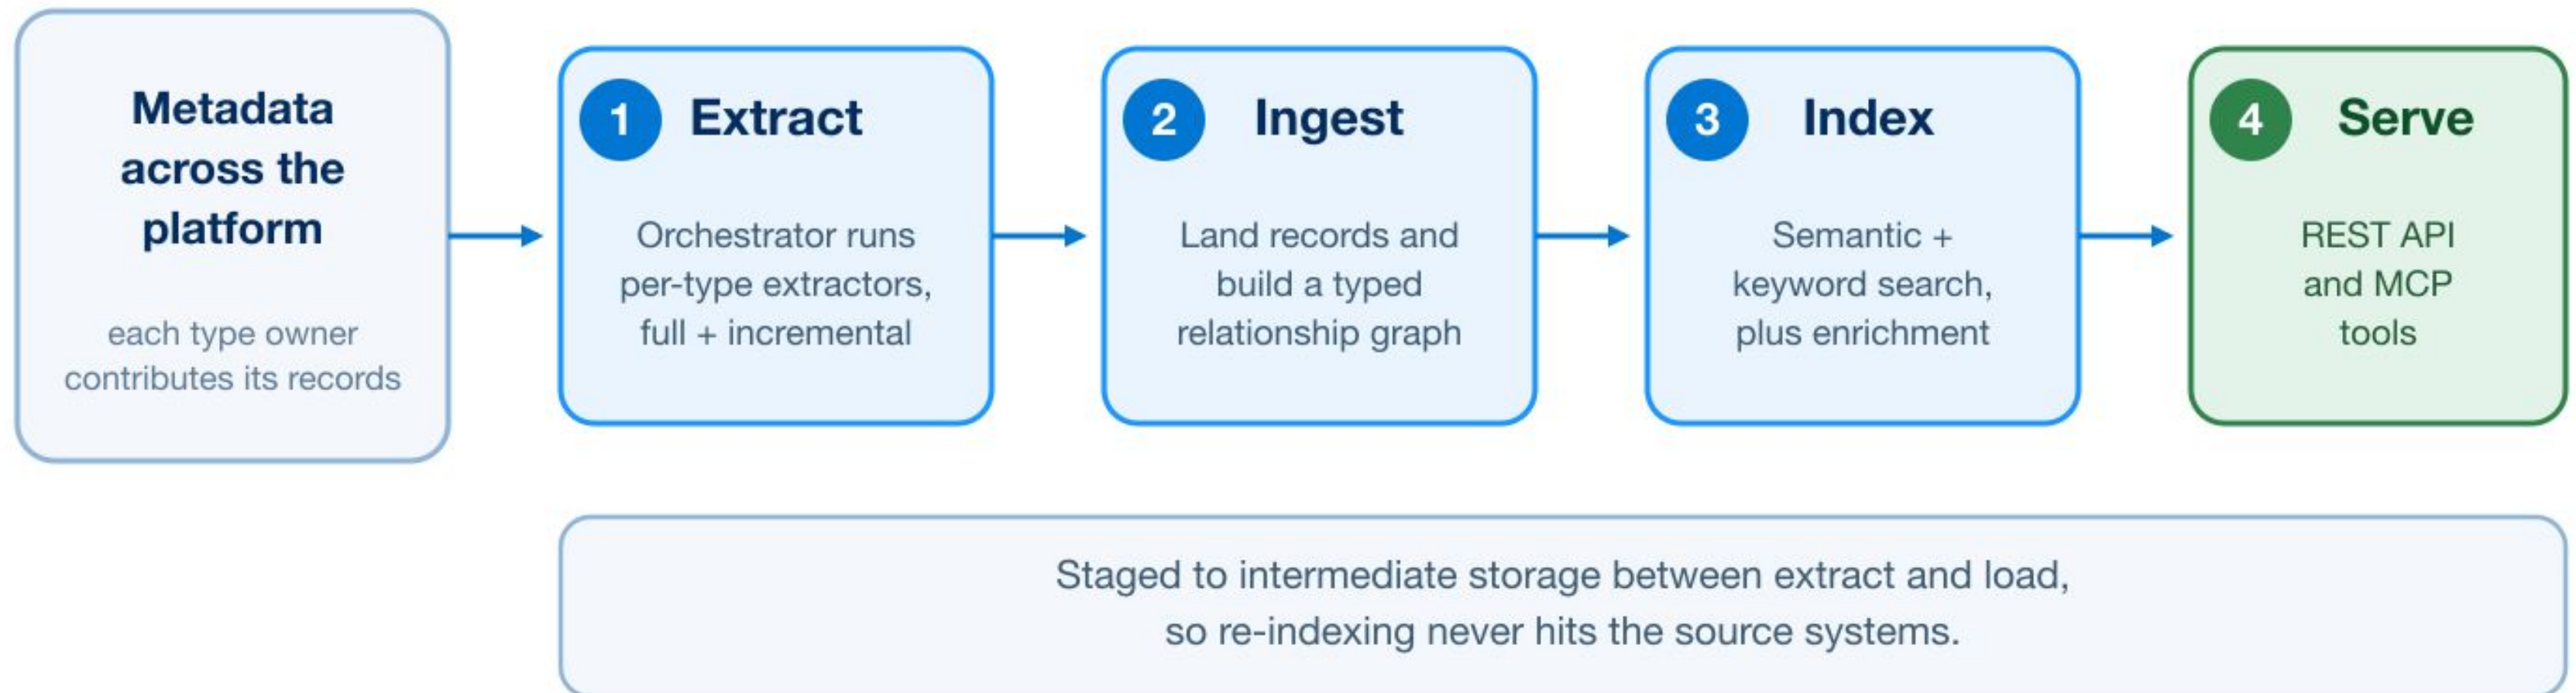

- ✓ Trusted, actionable data
- ✓ Institutional memory
- ✓ Accurate, deterministic discovery
- ✓ Empowered orchestration

How Salesforce Catalog is Built

Built on Data 360, so it scales to a large org's metadata

Extract, then ingest, then index, then serve. One pipeline, two front doors.

Salesforce Catalog APIs (GA Oct)

salesforce

Anatomy of a Catalog Asset (Metadata about your Metadata)

```
{
  "name": "AcmeSubscriptionChurn__cio",
  "label": "Acme Subscription Churn",
  "metadataType": "SObject",
  "metadataSubType": "CalculatedInsightObject",
  "identifier": "...:9sdSB...:SObject"
}
```

Query by Identifier or
Composite Key (metadataType + name)

Three levels of classification:

LEVEL 1: METADATATYPE

- SObject
- SObjectField
- ApexClass
- PermissionSet
- MktCalculatedInsight
- ...

LEVEL 2: METADATASUBTYPE

- CalculatedInsightObject
- DataModelObject
- CustomObject
- CustomPlatformEvent
- StandardBigObject
- ...

LEVEL 3: NAME

- AcmeSubscriptionChurn__cio
- AcmeCustomer__d1m
- Customers__d1l
- CustomerId__c
- *Tableau SDM (coming soon)*

Salesforce Catalog APIs Endpoints (GA Oct)

Read-only, secure API under /ssot/catalog-metadata

Describe: find out the **types** and **subtypes** of metadata, and their properties

`/types`
`/types/{typeName}`

Search: hybrid search for **assets**

`/search?query=&limit=[OPT]` // → Returns identifier

Inspect/Lookup : full profile of one **asset** or its **children**

`/?name=&metadataType=&metadataSubType=[OPT]` // → Returns identifier (via profile)
`/ {identifier}`
`/ {identifier}/children?limit=[OPT] &offset=[OPT]`

Relationships: understand how an asset is connected, upstream or downstream

`/ {identifier}/relationships?upstreamDepth=[OPT] &downstreamDepth=[OPT]`
`/relationships?name=&metadataType=&metadataSubType=[OPT] &upstreamDepth=[OPT] &downstreamDepth=[OPT]`

Reach the APIs Through Two Front Doors

salesforce

REST for your code

- Built into your app or CI/CD workflow

GET

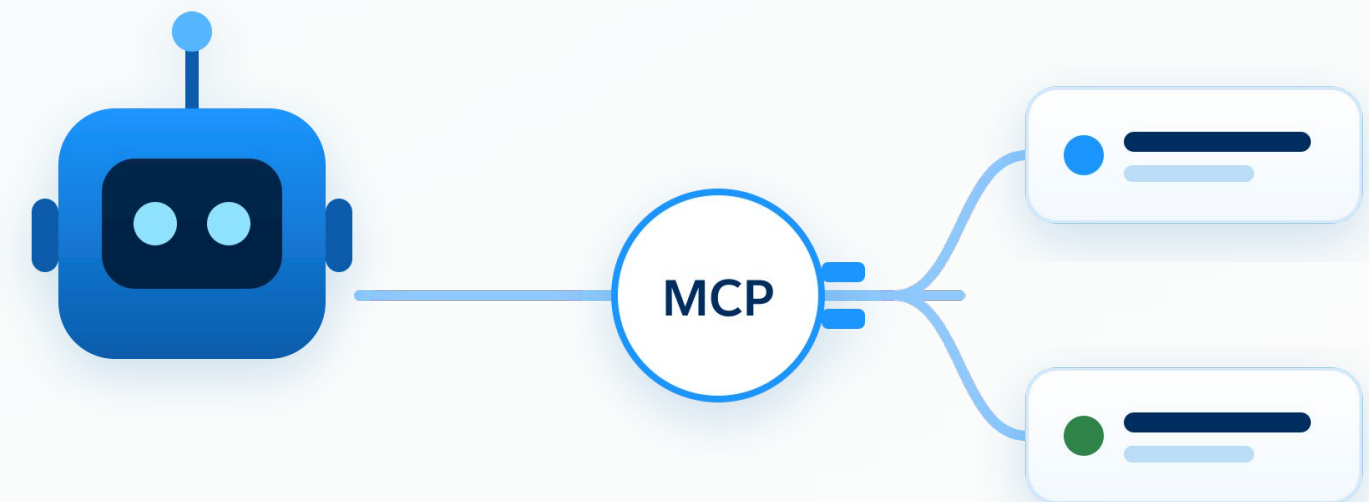

/ssot/catalog-metadata

```
{  [redacted]  [redacted]
  [redacted]  [redacted]
  [redacted]  [redacted]
}
```

MCP for your agents

How agents get grounded to not hallucinate:

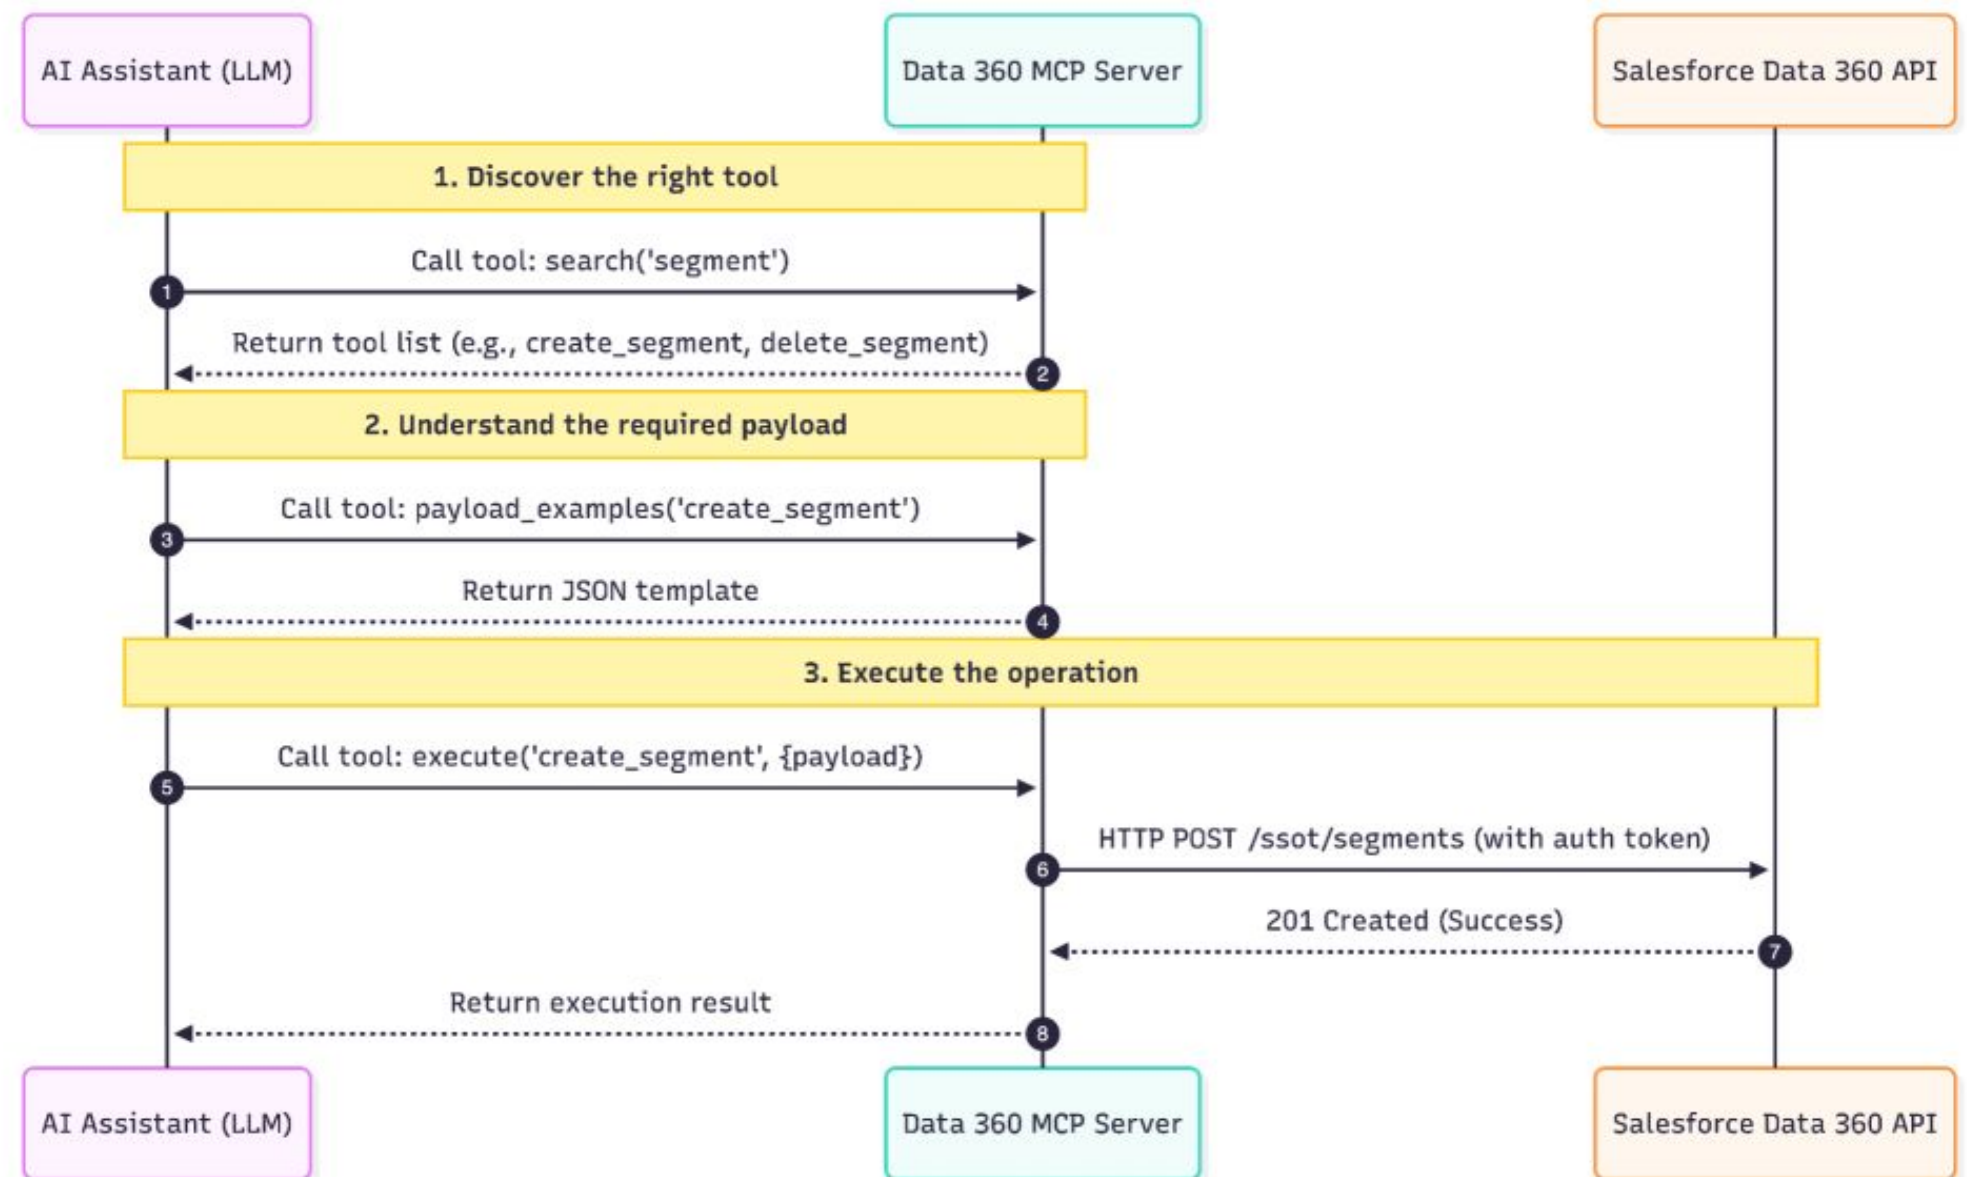

- Data 360 (core + Data 360 metadata)
- Metadata Grounding (core metadata)

Build Data 360 with the Data 360 MCP Server (GA)

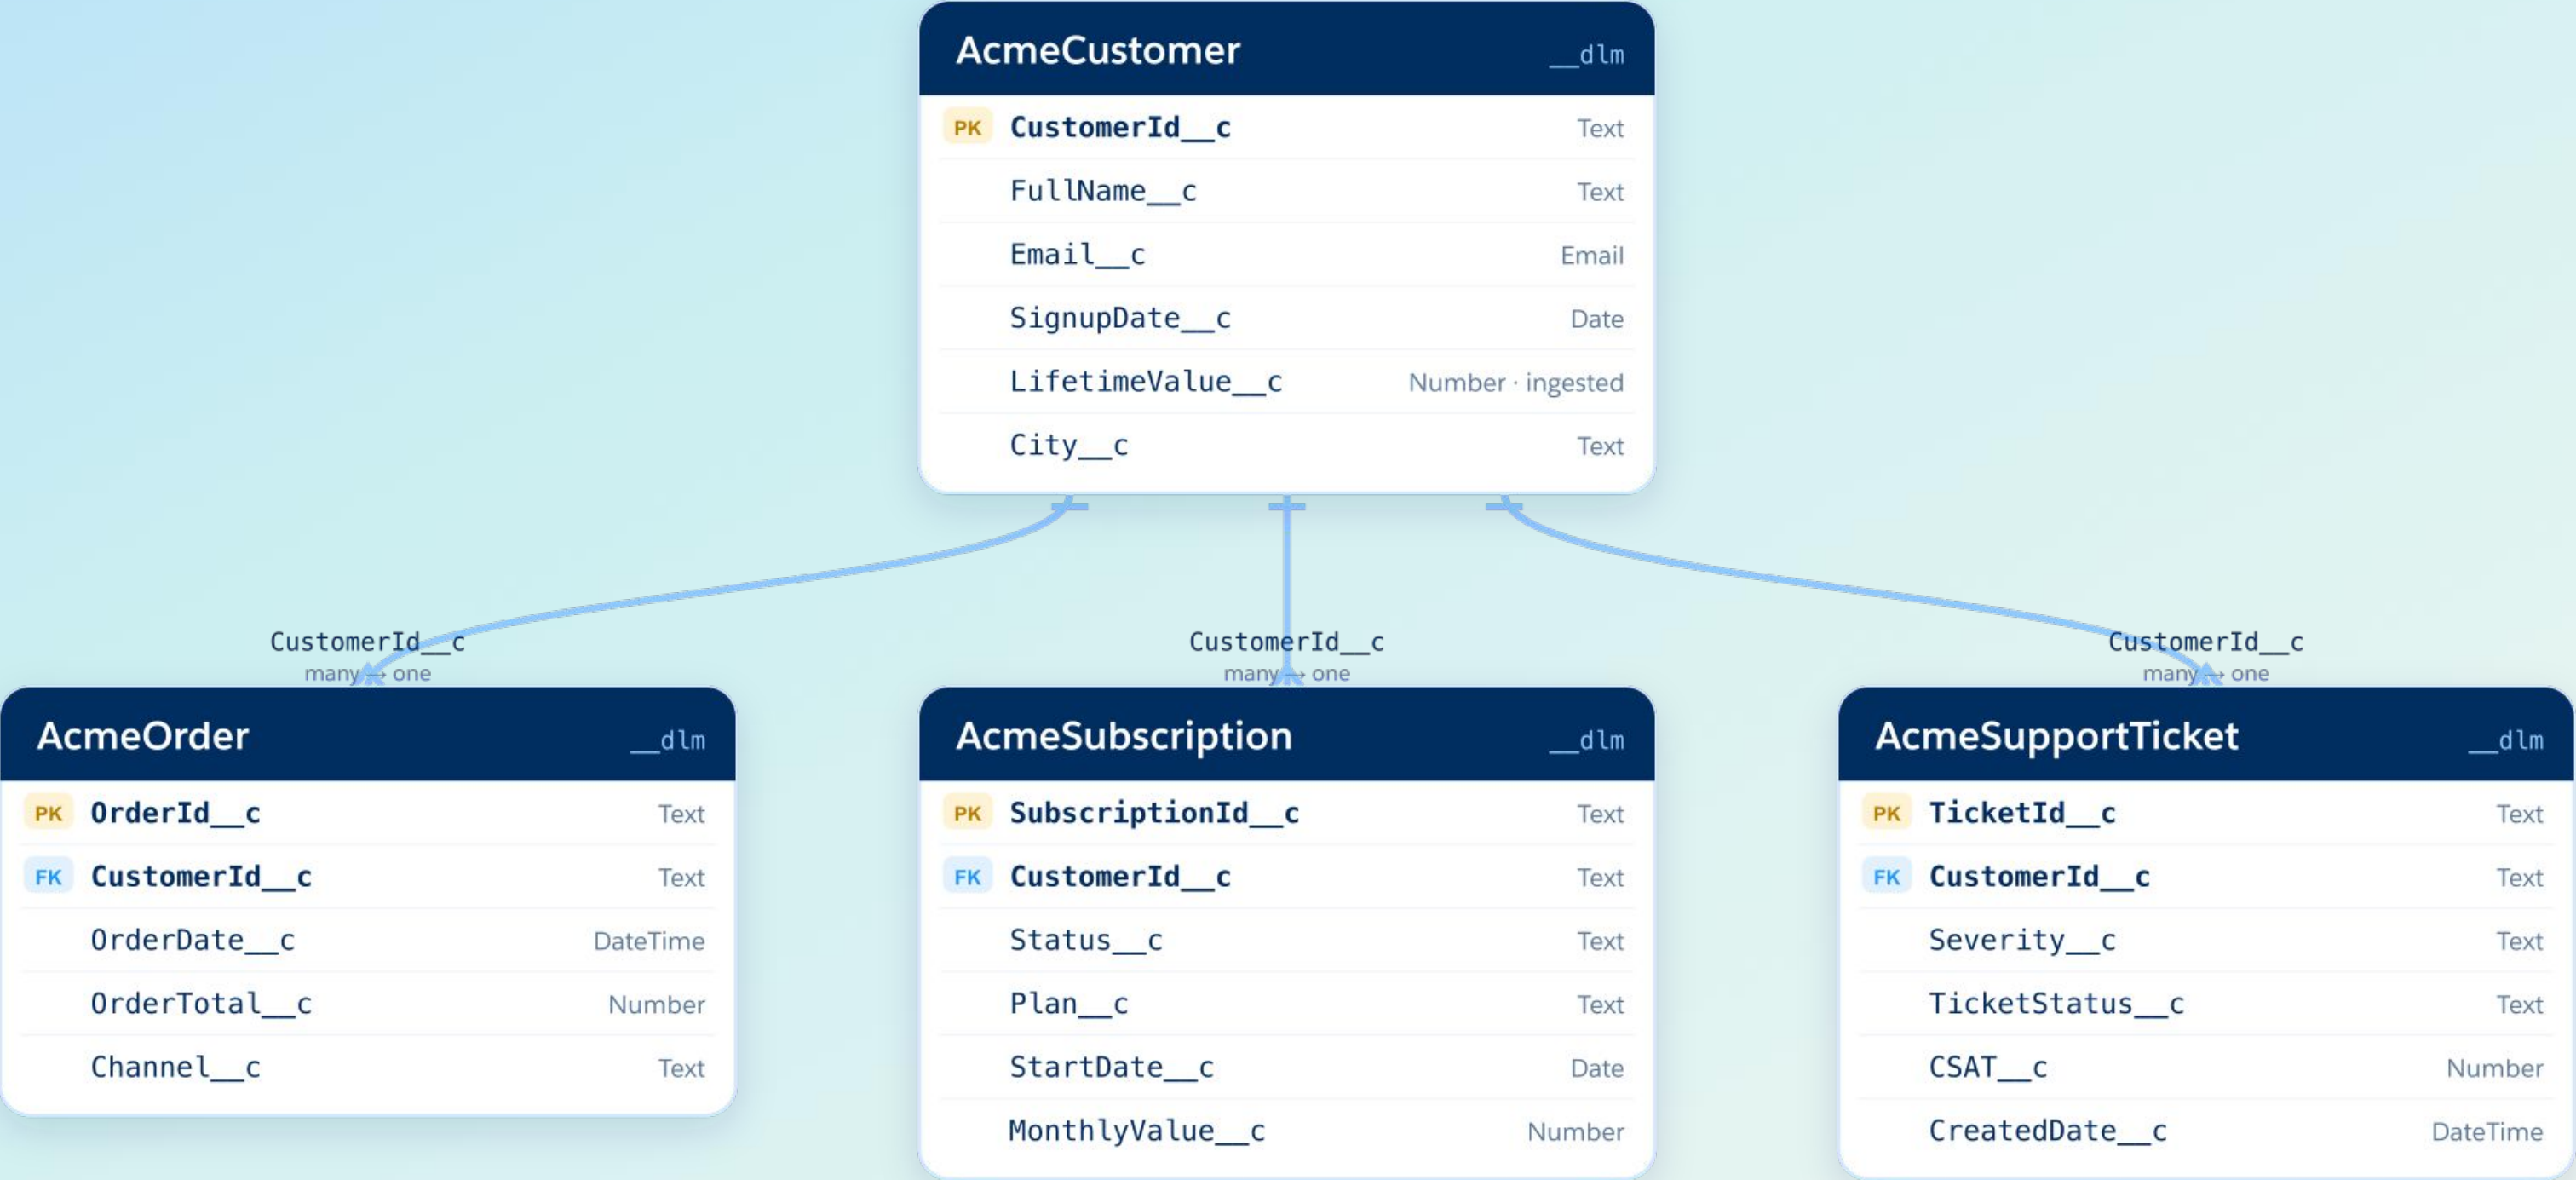

- Helps agents **build and operate** Data 360 in plain language
- Exposes about **200 Data 360 REST** operations through 3 tools:
 - **search** finds the right operation
 - **payload_examples** shows how to call it
 - **execute** runs it

Our Demo: Acme's Data Model

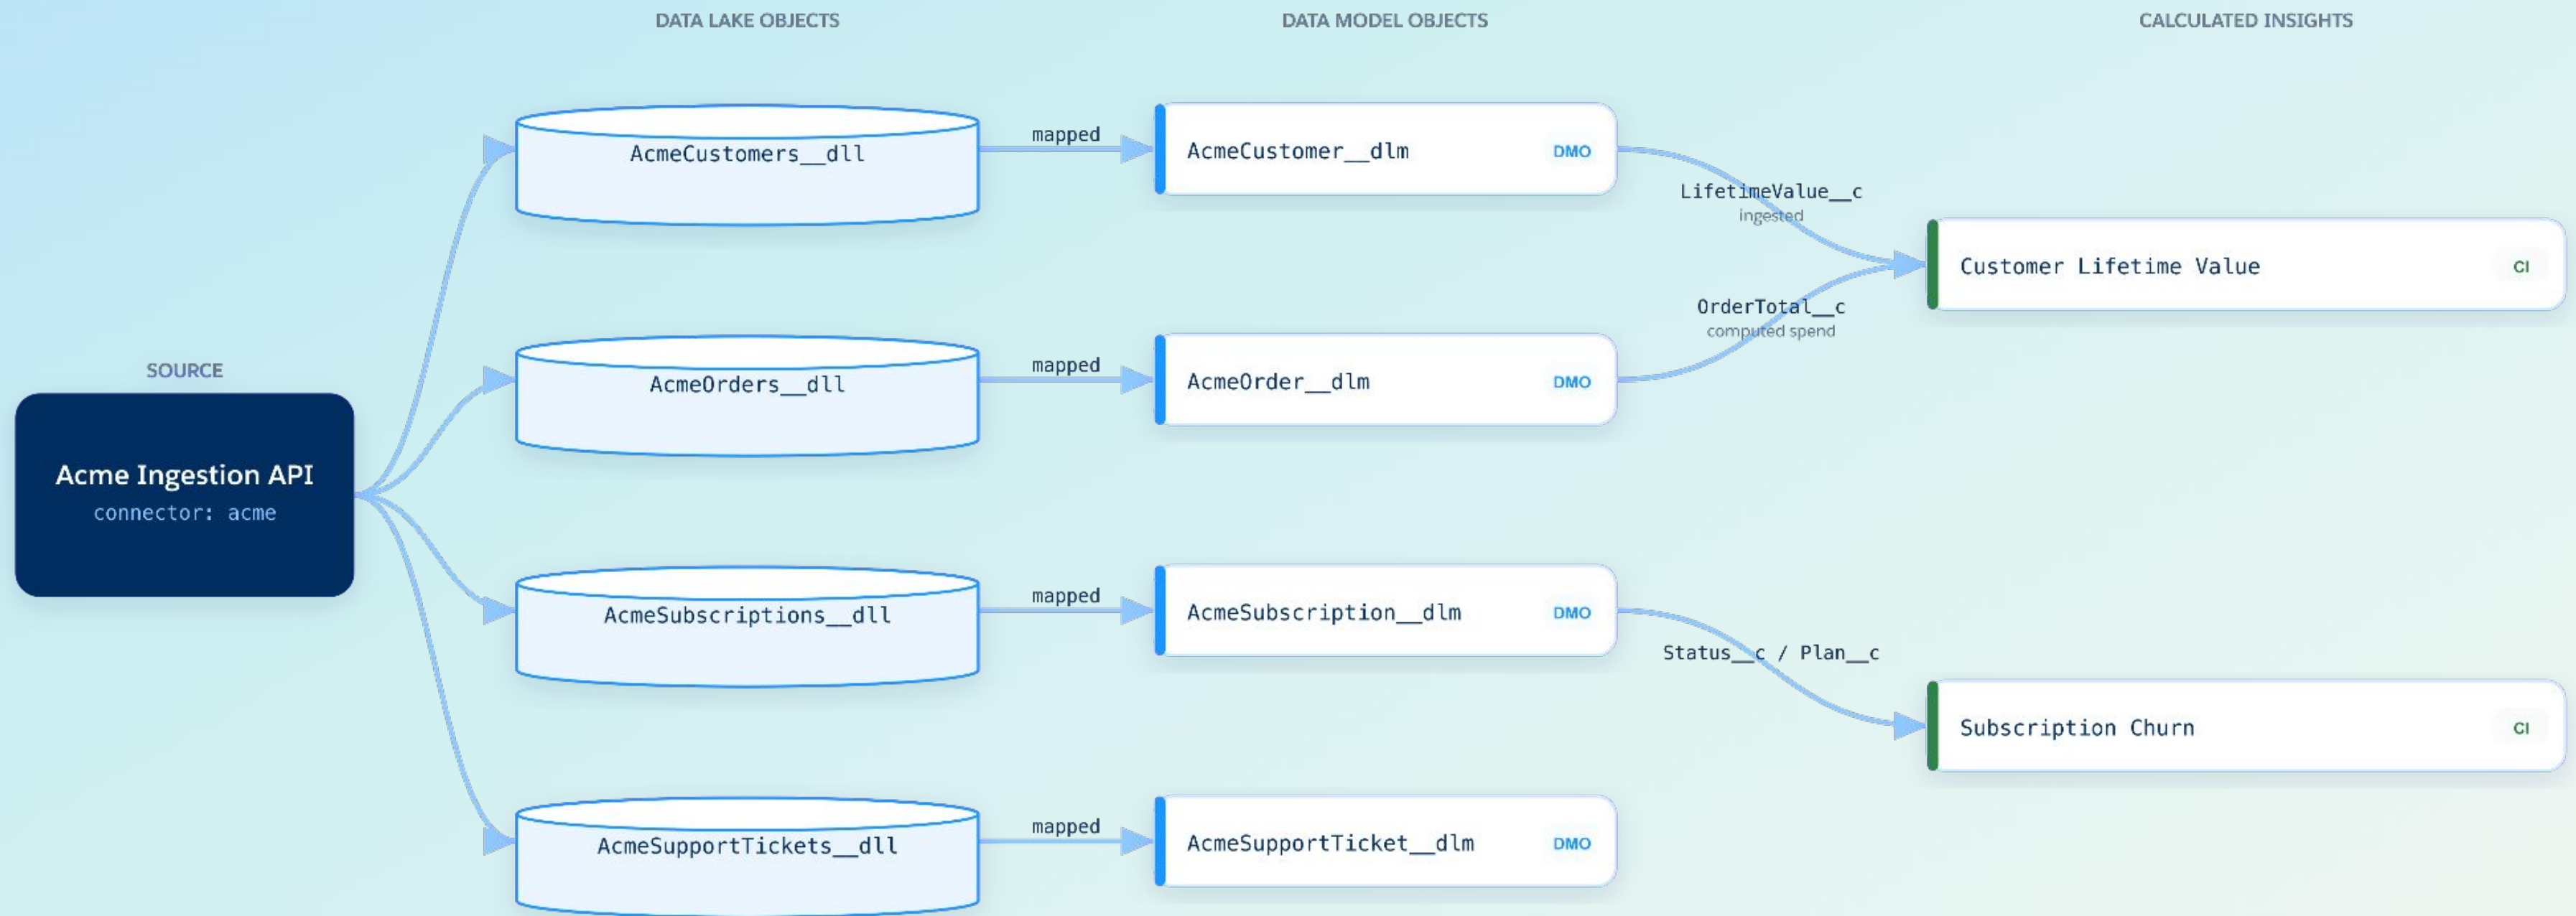

Acme sells products both one-off and by subscription.

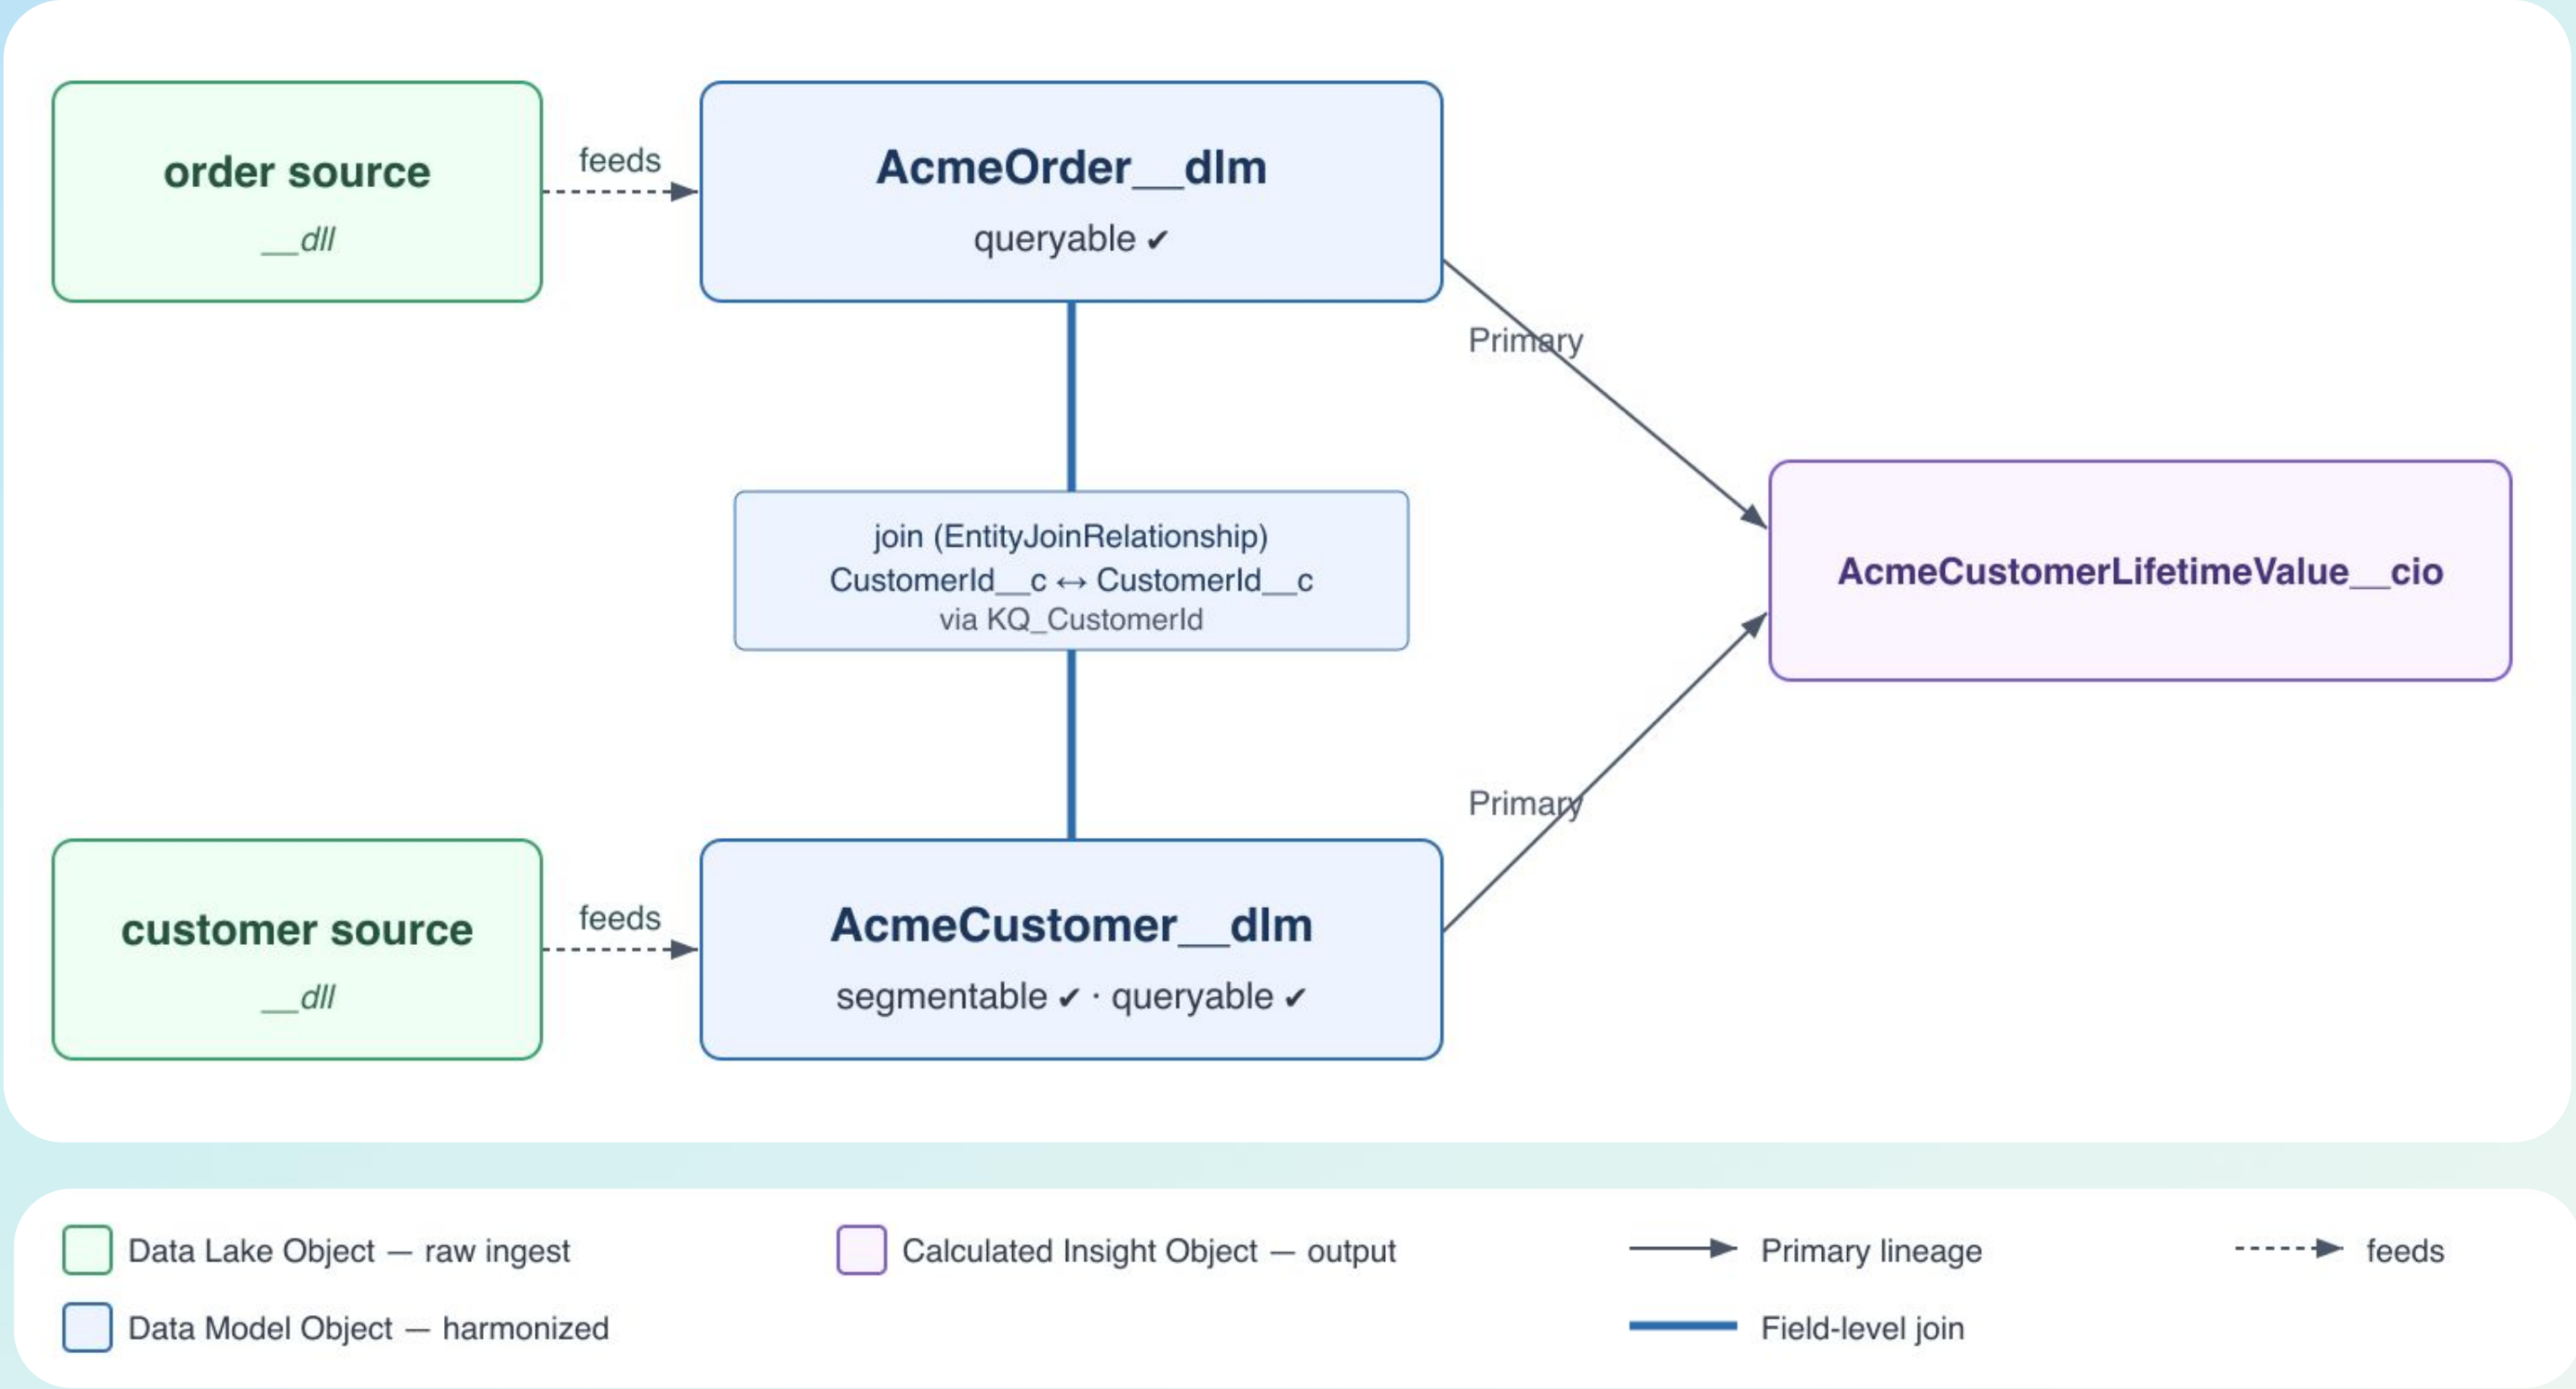

Our Demo: Acme's Data Flow

salesforce

Acme uses Data 360 to figure out which customers are most valuable (Lifetime Value) and which ones are about to quit (Churn).

Acme's Partial Catalog Metadata Graph

Our Demo: Salesforce Catalog APIs Use Cases

salesforce

Explore the Model

"What kinds of objects can the catalog model, and what properties does it track for a DMO?"

Semantic Search

"Show me anything related to churn or subscription cancellations."

Profile an Asset

"What fields does AcmeCustomer have, and which is the primary key?"

Trace Lineage (upstream)

"What is the source of the Customer Lifetime Value insight?"

Analyze impact (downstream)

"What breaks if I remove OrderTotal__c from AcmeOrder?"

salesforce

Demo: Salesforce Catalog APIs + Data 360 MCP Server in Action

⚠ 1 MCP server needs authentication · run /mcp

> /clear

> Run the catalog APIs demo

- I'll start by reading the demo runbook and slide questions from memory to run this exactly as intended.

Recalled 3 memories (ctrl+o to expand)

- Now firing the demo calls. Batch 1: Q1 (Describe), Q2 (Search), Q3-step1 (Lookup), Q4 (Lineage), Q5 (Impact).

Called salesforce-data360 5 times (ctrl+o to expand)

- Q3 chain – batch 2: get + children_list on the resolved AcmeCustomer identifier.

Called salesforce-data360 2 times (ctrl+o to expand)

- Salesforce Catalog APIs – Live Demo

|| manual mode on · esc to interrupt · ← 1 agent

Roadmap

Salesforce Catalog APIs Evolution & Capabilities

salesforce

01

GA OCT

PHASE 1: FOUNDATION

Read & Relationships

- **Read-Only API:** Surfaced under /ssot/catalog-metadata
- **Metadata Discovery:** Describe schema, search entities, and inspect fields
- **Relationship Walking:** Trace upstream/downstream lineage and joins
- **Context Engine:** Turn core & Data 360 metadata into verified business context

02

NEXT RELEASE

PHASE 2: AUTHORIZING

Write & Create

- **Write Capabilities:** Enable programmatic creation of catalog assets
- **Custom Definitions:** Introduce novel entity and relationship mappings
- **Metadata Enrichments:** TBD

03

FUTURE VISION

PHASE 3: GOVERNANCE

Admin Enrichments & Lifecycle

- **Admin Controls:** Full Update & Delete operations restricted to admins
- **Lifecycle Management:** Deprecation and archival workflows for metadata

How to Get Started

Catalog and Catalog APIs (GA soon)

Enable through **setup** → **Feature Manager** → **Catalog**

Data 360 MCP Server (GA)

Enable through **setup** → **MCP Server** → **Data 360**

Connect it into your Agent

Resources

Thank you

Coffee on us.

The first 4,000 attendees to provide feedback on this event will receive a \$5 Starbucks gift card.*

1. Download the Salesforce Events mobile app.
2. Navigate to surveys.
3. Complete (4) session surveys and the Event Survey.
4. Redeem your gift at Badge Pickup in-person on the last day of the event.
